

SCOUT PACKAGE

TARGET YOUR FRAUD CAUSE FILES OR POTENTIAL RECOURSE FILES

FOR A LUMP SUM,
the expertise includes the following steps:

- Summary visual inspection of the vehicle
- General photographs or photographs of particular elements
- Vehicle health record (search for recalls or similar cases in database, known problem, etc.)
- Study of the vehicle service history (recent interventions, recurrent problems, etc.)
- Determine if other parts should be involved in the file from the outset
- Discussion with the insured and documentation of the circumstances

These steps permit to target the fraud case files, reduce the undetermined causes and identify the ones with a very low potential of recovery. You will then be able to select the files for which it will be judicious to pursue the mandate, without compromising the quality of the expertise and while reducing your costs for the other files.

** This package applies to passenger vehicles
(cars, SUVs, pickup trucks, vans)*

** Travel expenses not included*

To entrust us with a mandate, contact us
